## DENTAL | EPAG-SMART

### EPAG-SMART THE SOLUTION FOR DENTAL LABORATORIES

OTEC's compact **EPAG-Smart T** electropolishing machine enables dental parts to be processed in just one step. It removes the smallest of scratch marks and waviness in a repeatable process without compromising tolerances or geometries.

### THREE STEPS IN JUST ONE PROCESS

**3 in 1**

**EPAG-Smart Process**

**2 denture clasps  
in 20 mins for €1 per workpiece**

### BENEFITS AT A GLANCE

- No manual work required for the buffing, pre-polish or electropolish stages
- Processing time reduced by 70%
- Uniform polishing even in hard-to-reach areas
- No compromise on tolerances or geometries
- Compact, cost-effective and ergonomic
